

# Ship Better Software, Faster, with Armory

## Armory Is Spinnaker at Enterprise Scale

Armory helps companies understand and optimize their entire software development lifecycle so they can ship better software, faster. Our platform is powered by Spinnaker, the de facto standard in cloud-native continuous software delivery, developed and open sourced by Netflix and Google. Armory brings the power of Spinnaker to your business, coupled with enterprise-grade availability, powerful feature extensions, and 24/7 expert support and services. We enable your engineering teams to work more efficiently and produce more output so your business can innovate faster.

## Features & Integrations

Out of the box, Spinnaker is a flexible, cloud-native continuous delivery platform built for scale. It offers game-changing features for seamless multicloud and hybrid cloud deployments, complete pipeline visibility, blue/green deployments, and automated canary analysis, and is tightly integrated with Kubernetes. Spinnaker's automation, policy enforcement, integrations and other features also significantly improve security and compliance. With a vibrant and growing open source community and the backing of the leading cloud infrastructure providers, the Spinnaker platform is continually adding new features and functionality.

Armory enhances and extends Spinnaker, with compelling enterprise-grade features including:

- **Armory Halyard Installer**  
Install, configure, deploy and update your Spinnaker instance with ease
- **Armory GitOps-Enabled Pipeline-as-Code**  
Define, modularize and manage Spinnaker pipelines via source code repos
- **Armory SDLC Policy Engine**  
Set up and enforce pipeline compliance rules across your entire enterprise
- **Armory Terraform and Vault Integrations**  
Seamless integration with HashiCorp Terraform & Vault, and other tools

## Support

In addition to the dedicated open source community, we provide deep domain expertise and 24x7 service to our customers. Our services extend from installation to operationalization to training and ongoing access to our solutions architects and Spinnaker experts. We also provide customers the option of a managed Spinnaker instance running in their data center.

*"With Armory's Platform we've reduced years of accumulated tech debt, enabling us to deploy 10x faster and to significantly reduce infrastructure and operational costs."*
